PATENT

**Listing of Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (currently amended) A method for treating a burn pain, the method comprising the step of peripheral [[local]] administration of an effective amount of a botulinum toxin to a mammal, thereby alleviating the treating burn pain.
- 2-3. (canceled).
4. (previously presented) The method of claim 1, wherein the botulinum toxin is selected from the group consisting of botulinum toxin types A, B, C<sub>1</sub>, D, E, F and G.
5. (previously presented) The method of claim 1, wherein the botulinum toxin is botulinum toxin type A.
- 6-8. (canceled)
9. (previously presented) The method of claim 1, wherein the pain is alleviated for between about 1 month and about 6 months.
- 10-11. (canceled)
12. (currently amended) A method for alleviating a burn pain, the method comprising the step of peripheral administration of an effective amount of a botulinum toxin type A to a human patient, thereby alleviating the [[a]] burn pain.

PATENT

13. (previously presented) The method of claim 12, wherein the botulinum toxin is selected from the group consisting of botulinum toxin types A, B, C<sub>1</sub>, D, E, F and G.

14-28. (canceled)

29. (currently amended) The method of claim 1 [[28]], wherein the peripheral administration of the botulinum toxin is carried out by intramuscular administration of the botulinum toxin.

30. (previously presented) The method of claim 29, wherein the intramuscular administration of the botulinum toxin is carried out by intramuscular administration of the botulinum toxin into the region of the burn pain.

31. (currently amended) A method for treating a burn pain, the method comprising the step of local administration of an effective amount of a botulinum toxin to a region of a burn, thereby alleviating the treating burn pain.

32. (previously presented) The method of claim 31, wherein the botulinum toxin is a botulinum toxin type A.

33. (currently amended) A method for treating a burn pain, the method comprising local administration of an effective amount of a botulinum toxin and no other pain alleviating agent, thereby alleviating treating the burn pain.

34. (previously presented) The method of claim 33, wherein the botulinum toxin is selected from the group consisting of botulinum toxin types A, B, C<sub>1</sub>, D, E, F and G.
